

PERMISSION TO SCREEN

The Regional Office of Education #12 in accordance with the Illinois State Board of Education's Preschool For All Grant, will need to screen each child for a preschool program. This screening is done in a play atmosphere where teachers use an assessment tool to help place children in a program that is best suited for them. Results of each screening will be shared with parents/guardians upon completion of assessments, and will give everyone a clear picture of the developmental track each child is on.

I understand that my child's screening and all other information will be used in order to determine eligibility for the pre-k classrooms. I also understand that my request for a specific pre-k classroom will be taken into consideration upon determination of eligibility, and will be considered but may not be available for my child at this time, where a second or third choice will be offered. Should I turn down a position for my child, his/her name will go directly to a waiting list.

I understand and agree to the above statements and give my permission to the ROE #12 to screen my child.
