AN INTRODUCTION FOR TEACHERS

SEPTEMBER 18, 2023   9AM - 1PM

ROE #12 PD TRAINING CENTER - ROBINSON

Join us as we delve into the fascinating realm of artificial intelligence (AI) and its incredible potential in education. This workshop offers educators a comprehensive exploration of AI's fundamentals, advantages, and limitations, along with invaluable insights into leveraging AI tools to elevate teaching and learning experiences in the classroom.

Moreover, participants will have the opportunity to acquaint themselves with ChatGPT3, discovering its impressive capabilities and recognizing the boundaries it operates within. This groundbreaking, state-of-the-art language model will be showcased as a powerful tool for generating captivating and innovative educational content.

Throughout the workshop, participants will actively engage in hands-on activities and stimulating interactive discussions, enabling them to put their newfound knowledge into practice within real-world scenarios. By the workshop's culmination, attendees will possess a deeper understanding of how AI and AI applications can effectively enhance teaching and learning, equipped with the skills necessary to seamlessly integrate these tools into their own classrooms.
