CENTER of ILLINOIS

Technology Roundtable
12:00 pm - 2:00 pm

FREE – For IT Directors

Join the Learning Technology Center for an engaging and critical workshop where your district's leadership team, including superintendents and technology directors, will participate in a Cybersecurity Tabletop Exercise. This session simulates a real-world cyber attack in a controlled, scenario-based environment to test and enhance your district's response strategies.

This proactive approach is akin to a fire drill for cyber attacks, aiming to prepare your team for actual incidents by ensuring that all systems and protocols perform optimally under stress. Though it'll feel like a game, this exercise will equip your leadership team with the knowledge and skills needed to safeguard your organization against future cyber threats.

Workshop Objectives:

- Engage in Role-Playing Scenarios: Participants will navigate through the process of managing a cybersecurity incident as it unfolds, making real-time decisions based on their roles and responsibilities.

- Assess Response Plans: This exercise will test your current cybersecurity measures and protocols to identify strengths and uncover potential weaknesses in your response plan.

- Receive Expert Feedback: IT professionals will monitor the exercise, providing insights and feedback on the effectiveness of your actions and decision-making processes.

- Improve Preparedness: Utilize the outcomes of this exercise to refine your strategies, close any gaps in your processes, and strengthen your overall cybersecurity posture.

* Lunch included with registration fee for workshop

Join us for an open discussion on the current state of technology in our schools. This networking meeting is designed for technology directors, instructional technology coaches, and anyone interested in the intersection of education and IT. We'll tackle challenges, share successes, and explore the evolving edtech landscape. Come brainstorm, ask questions, and connect with colleagues. Whether you're seeking solutions, want to stay ahead of trends, or need a supportive space, this meeting is for you!
